<b>SQ.FT. / GALLON @ ONE MIL -</b>	<b>241</b>	<b>321</b>	<b>401</b>	<b>481</b>	<b>561</b>	<b>642</b>	<b>722</b>	<b>802</b>	<b>882</b>	<b>962</b>

1. Locate Solids by Volume from Product Data Sheet.
2. Read down the left hand column to locate approximate cost per gallon.
3. Read across to the right to the nearest matching solids by volume column.
4. Price listed is in cents per mil per square foot. Multiply price by mils required as listed on data sheet.

Example: If a paint product costs 12.00 per gallon, has a solids by volume of 45% and is applied At 2.0 mils, the cost of material is computed to be 3.2 cents per square foot

Note: Allowances are not made for application loss
